

## *Building a Firm Foundation*

**“You can't build a great building on a weak foundation. You must have a solid foundation if you're going to have a strong superstructure.”**

- Gordon B. Hinckley

Often businesses try to build their businesses too quickly, and with too much force without having the necessary foundations put into place. Establishment of a firm foundation is essential to build up from. Things like marketing, social media, your business infrastructure, processes, budgeting, business plans, and much more else needs to have a lot of consideration. All of these things need a lot of thought and planning, in order to make lasting and strong impact.

You don't want to be a quick fuse, a “one-hit wonder”, a short spark that fizzled for a little while without any longevity.

Every brand and business wants to last for a long time, in order to make impact and be sustainable.

Having set processes, and establishing strong working relationships is vital to having a strong foundation to your business. You need strong members within your team to not only rely upon when you require them but to have the expertise and knowledge and experience to see your plans through.

When you think of businesses with good foundations, you think longevity and impact. Businesses out there that have a great foundation include the following businesses; Coca Cola, Pixar, McDonald's and much, much more. And it doesn't matter if these businesses started out small, they built from the ground up, and built with detail and growth in mind. This is why they last, and still have great impact today.

Do you want to make a lasting impact too?
